EBRAHIM YOUNIS | DATA ANALYST

about me.

I am Ebrahim Younis, a Computer Science and Artificial Intelligence student. My passion lies in discovering the stories hidden behind numbers. I don't just see data as tables; I see it as a powerful tool for making smart decisions and driving business growth.

I possess strong technical skills in Excel, SQL, and Python for data processing, along with creating stunning interactive dashboards using Power BI and Tableau. I enjoy the entire data journey, from meticulous data cleaning to delivering visual solutions that simplify complexity.

education.

Bachelor of Computers and Information

**Mansoura University Faculty
of Computers and Information**

**Major: Artificial Intelligence
Duration: 2023 – 2027 (3rd Year)**

Advanced Data Analytics & Business Intelligence

Professional Certifications:
NTI: Data Analytics (120 Hours)
CCIC: Data Analysis (72 Hours)
QSC: Advanced Data Analytics

Technical Toolkit:
**Python, SQL, Power BI, Tableau,
and Excel. (Advanced Data
Visualization & Cleaning)**

SKILLS.

SQL

Tableau

Python

Power BI

Machine Learning

Data Cleaning

Statistical Analysis

Advanced Excel

EXPERIENCE.

Professional Training

NTI, CCIC & QSC

Completed 192+ hours of intensive technical training in Data Analytics. Gained hands-on experience in Data Cleaning, advanced SQL querying, and data transformation. Achieved top-tier evaluations with an 88.5% score and "Excellent" grades across all professional programs.

PROJECTS & SHOWCASE

GitHub Data Projects

Developed data projects hosted on GitHub using Python and SQL for data manipulation. Created professional Power BI & Tableau dashboards and advanced reports using Excel to transform raw data into actionable insights.

See full projects on GitHub :(<https://github.com/ibrahimmahmoudyounes-lab>)

Offered Services.

Automotive Market Insights

- Goal: Interactive Dashboard for car pricing & market trends.
- Tool: Tableau (Data Visualization).
- Insight: Visualized price trends across brands and fuel types.
- [[View Project](#)]

Adidas: Strategic Roadmap

- Goal: Interactive Excel Dashboard for sales & growth tracking.
- Tool: Microsoft Excel (Advanced Dashboards).
- Insight: Analysis of \$120.2M total sales across retailers & methods.
- [[View Project](#)]

Netflix Content Dashboard

- Goal: Strategic analysis of streaming trends using SQL for ETL and Power BI for visuals.
- Tool: SQL & Power BI.
- Insight: Engineered duration metrics and year-over-year growth for 8,000+ titles.
- [[View Project](#)]

Fast Food & Health Impact

- Goal: Analyzing fast food habits vs. BMI & activity.
- Tool: Python (Data Analysis & EDA).
- Insight: Balanced BMI and caloric intake trends across all genders.
- [[View Project](#)]

Barley Production Insights

- Goal: Visualizing crop yields and variety performance across sites.
- Tool: Tableau (Data Visualization).
- Insight: Identifying high-yield varieties and regional production trends.
- [[View Project](#)]

Netflix Content Analysis Dashboard

project 01.

Key Insights

- Movies represent the majority of Netflix content.
- Content additions increased significantly after 2016.
- Mature audience ratings dominate the catalog.
- Content production is concentrated in a few countries.

Tools & Technologies

SQL (PostgreSQL), Power BI,
Data Cleaning, Data
Visualization

Project Overview

Developed an interactive dashboard to analyze Netflix movies and TV shows using SQL for data preparation and Power BI for visualization. Data was cleaned, transformed, and structured to explore content distribution, ratings, country contribution, and content trends over time.

Live Dashboard & Source Code: [<https://github.com/ibrahimmahmoudyounes-lab/Netflix-Content-Analysis>]

Barley Market Insights Dashboard

Key Insights

- Production peaked in the late 1980s before entering a gradual decline.
- Trade balance volatility indicates exposure to external supply shifts.
- Human consumption consistently exceeds animal feed demand.
- Import spikes align with lower domestic production periods.
- Export dominance is concentrated within a limited historical window.

Tools & Technologies

Tableau • Data Cleaning • Data Analysis • Data Visualization

Project Overview

Developed an interactive dashboard to analyze Netflix movies and TV shows using SQL for data preparation and Power BI for visualization. Data was cleaned, transformed, and structured to explore content distribution, ratings, country contribution, and content trends over time.

Interactive Dashboard: [https://github.com/ibrahimmahmoudyounes-lab/BARLEY-MARKET-INSIGHTS]

Fast Food Nutrition Data Analysis

Average Overall Health Score by Gender

```
Gender_Overall_Health_Score =df.groupby('Gender')[['Overall_Health_Score']].mean()
Gender_Overall_Health_Score
```

Gender	Overall_Health_Score
Female	4.96
Male	4.94
Other	4.41

Data Cleaning

Handled missing values and verified data types for 18 columns (age, study hours, etc.) to ensure reliable stats.

Visualization

Created Seaborn plots to show the relationship between focus scores and productivity metrics.

Key Insights : Identified the correlation between screen time and GPA, highlighting factors that optimize student performance.

EDA

Analyzed the impact of lifestyle factors (sleep, phone usage, stress) on students' final grade.

Tech Stack

& Python: Pandas for data processing | Seaborn Matplotlib for visual analysis.

Source Code: [https://github.com/ibrahimmahmoudyounes-lab/fast_food_analysis]

Achievement.

Professional Achievements

.Successfully completed intensive Data Analysis training programs
,Built multiple end-to-end data analysis projects using Excel, SQL
Python, Power BI & Tableau. Applied data cleaning, transformation, and
visualization best practices. Developed interactive dashboards
delivering clear business insights. Continuously expanding analytical
and technical expertise

Professional Certifications

Advanced Data Analytics – National Telecommunication Institute (NTI) | Sep 2025

(Completed 120 Hours: 90 Technical hrs + 30 Freelancing hrs | Score: 88.5%)

Advanced Data Analytics Certification – Qualitative Studies Center (OSC) | Aug 2025

(Comprehensive training in Python, Excel, Power BI, and SQL with AI integration | Grade:
Excellent)

Data Analysis (Excel, Power BI, SQL) – CCIC, Mansoura University | Sep 2025

(Intensive 72-hour training program)

Power BI Analytics – Empirici Academy | Sep 2025

(Specialized certification within the Data Analysis Track)

SQL Fundamentals – Empirici Academy | Sep 2025

(Core database querying and management certification)

Technical Project Experience

End-to-end data analysis workflow (Data
→ Cleaning → Exploration → Visualization
Insights). Interactive dashboard
development (Power BI & Tableau). SQL
querying & data extraction from
structured databases. Exploratory Data
Analysis using Python. Business reporting
KPI tracking &

Contact Me.

I'm currently open to internships, freelance projects, and data analyst opportunities.

If you're looking for someone passionate about data, problem-solving, and building insightful dashboards, I'd love to connect and discuss how I can add value to your team.
